

How can we *enable seniors to age well?*

We can help our seniors age with meaning and retire with peace of mind, while staying active and engaged in the community.

Why?

By 2030, one in four will be aged 65 and above. Our healthcare needs will increase as we get older. Many also worry about their ability to meet basic needs and take care of themselves when they stop working.

A new national programme called Age Well SG:

More **activities in the community**, for seniors to connect and stay active

More **accessible services** for seniors with care needs

Make our **homes and neighbourhoods** more senior-friendly

Ensure seniors retire with peace of mind:

Majulah Package for 'young seniors' to **meet their basic retirement needs** as long as they work and contribute to CPF consistently
