

The Singapore of today is built on
***Resilient individuals,
Strong families and
Caring society***

As society evolves,
we need to review
and refresh our
social compact so that it
stays relevant

● How do we **strengthen** families to lay the foundation for our society?

● As a community, what can we do better to **uplift** those who need more help and to **give opportunities** to lower-income children and families to build a **better tomorrow?**

● How can we better provide **Comprehensive, Coordinated and Convenient** support to families so that families achieve Stability, **Self-reliance, and Social mobility?**
