

How can we *support families through every stage?*

We want Singapore to be the best place for Singaporeans to start, grow and nurture their families.

Why?

Families are experiencing higher caregiving demands from an ageing population and shrinking family sizes. Young Singaporeans are anxious about housing, child-raising costs, and work-life harmony.

Ensure public housing remains **affordable** and **fair**, and maintains a **good social mix**

More support for **parents of infants**, through parental leave and infant care options

Support Singaporeans' **mental well-being and work-life harmony**, such as through flexible work arrangements

More support for our **caregivers**
