

How can we *invest in our shared tomorrow?*

We will continue stewarding our limited resources responsibly and sustainably, so that we can meet our needs today, while also providing a strong foundation for future generations.

Why?

Our social compact is intergenerational.
We are all responsible for our shared future.

Plan for the long term, to **optimise limited land** and secure a **climate-resilient future**

Strengthen **our food and water security**

Uphold **fiscal prudence and responsibility**, taking care of our needs today and ensuring a better future for our next generation
