

How can we be better stewards of our environment and

make Singapore a green, liveable & climate-resilient home?

How do we balance:
Economic progress,
social inclusion and
environmental protection?

These are some questions to think about:

- In pursuit of a **more sustainable future**, what are some challenges and trade-offs we have to consider?
- How can we build a stronger culture of **lower our carbon footprint?**
- How can we change the way we live, work and play to **Reducing, Reusing and Recycling our waste?**
- How can we work together to **protect our coastlines from rising sea levels?**
- What can we do as individuals and community to **strengthen our food security?**
